SUMMARY

B.Tech Artificial Intelligence student with hands-on experience in Python, SQL, REST APIs, and cloud-ready applications. Strong problem-solving and analytical skills gained through developing automation and data-processing solutions. Familiar with Windows environments, networking fundamentals, incident troubleshooting, and user support. Eager to contribute technical expertise, communication skills, and a customer-focused mindset in an IT Service Desk role.

SKILLS

IT Support & Troubleshooting: Windows OS, Software Troubleshooting, Application Support

Programming: Python, SQL

Networking: Networking Fundamentals, VPN Concepts, TCP/IP Basics

Tools & Technologies: FastAPI, Power BI, Microsoft Office, GitHub

Concepts: REST APIs, Incident Management, Documentation, Data Validation

Soft Skills: Communication Skills, Customer Service Orientation, Problem-Solving, Team Collaboration, Analytical Thinking

PROJECTS

IT Help Desk Ticket Management System

Sep 2025

Developed a ticket management application to simulate IT support operations. Implemented ticket creation, priority assignment, status tracking, and incident documentation workflows supporting 100+ simulated support requests. Built REST APIs for issue logging and resolution tracking, improving support process visibility and organization.

Technologies: Python, FastAPI, SQLite, REST APIs

Invoice Extraction & Quality Control Service

Nov 2025 – Dec 2025

Developed a Python-based service to extract structured information from invoice PDFs including invoice numbers, dates, vendor details, and amounts. Processed and validated 500+ invoice records using schema-based quality checks to identify missing or inconsistent fields. Exposed the functionality through CLI and FastAPI REST APIs for automated validation and backend integration.

Technologies: Python, FastAPI, REST APIs, CLI, ETL, Data Validation, AWS S3 (Basics)

Coffee Quality Analysis (Power BI)

Aug 2025

Developed an interactive dashboard analyzing coffee quality metrics such as aroma, acidity, and flavor across multiple regions. Created DAX measures and visualizations to evaluate quality scores and identify key patterns, improving data-driven insights for quality assessment.

Technologies: Power BI, DAX, Power Query, Data Modeling

EXPERIENCE

Data Analyst Intern — Odin School (Bootcamp)

Jul 2025 – Ongoing

Working on real-world analytics projects using SQL, Power BI, and Python. Built BI solutions including Swiggy Operations Dashboard, Retail Sales Insights, and E-commerce Analytics. Applying ETL workflows, modeling, and visualization techniques across diverse datasets.

EDUCATION

B.Tech in Artificial Intelligence

Anurag University — 2026 — CGPA: 7.2

Intermediate

Narayana Junior College — 2020–2022 — 89%

SSC (Telangana Board)

Shine High School — 2018–2020 — GPA: 10

CERTIFICATIONS

- Data Science Bootcamp – Odin School (Python, SQL, Power BI, ML)
- Microsoft Power BI Data Analyst (PL-300) – In Progress
- Python for Everybody – University of Michigan (2025)

ACHIEVEMENTS

- Completed 20+ BI, SQL, and Python projects during the bootcamp.
- Recognized for strong dashboard design and analytical thinking.
- Achieved R² score of 0.91 in a machine learning prediction project.

DECLARATION

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge and belief.
